

HUB MAINTENANCE ACCESSORIES

Everything needed for a smooth operation

BPW'S GREASE APPLICATOR

The applicator will save you hours packing bearings by hand. This simple but clever device delivers the right quantity of grease to the right place within seconds and is an invaluable tool in every workshop. BPW grease applicators for standard roller bearings are based on serial production equipment and enable bearings to be greased with optimum results.

Features and benefits

- Precise grease quantities - no waste
- Long service life of tapered roller bearings thanks to a clean grease fill
- Compact, enclosed design - easy handling
- Clean work space - no additional cleaning costs
- A separate grease applicator for each bearing size (9 t, 10 t)

BPW'S ECO-Li Plus GREASE

In long term studies performed by BPW into various high-quality grease types, BPW ECO-Li Plus special long-life bearing grease achieved the best results. ECO-Li Plus is a top class lithium complex grease, suitable for long-life applications in both normal and high temperatures.

Features and Benefits

- Reduced bearing friction
- Excellent lubrication effect
- Very good adhesion properties
- Highly effective wear protection
- Best corrosion protection properties
- Can be used even in anti-friction bearings subject to high temperatures
- Various container sizes available
